Fashion Designing: From Sketch to Runway

From Creative Concepts to Catwalk-Ready Collections

This course takes you on a journey through the world of fashion design, from the first pencil sketch to the final runway showcase. You'll learn essential skills in sketching, fabric selection, pattern making, and garment construction, while exploring color theory, style trends, and the business side of fashion. Perfect for aspiring designers and fashion enthusiasts ready to bring their creative visions to life.

Key Points:

- Understand the fundamentals of fashion design and style trends
- Learn sketching, pattern making, and garment construction techniques
- Explore fabric types, textures, and how to select materials effectively
- Master color theory and visual storytelling in fashion
- Gain insights into fashion marketing and brand building
- Develop a portfolio and prepare for runway presentations
